

**The only french hospital
network 100% dedicated to
the fight against cancer**

Care • Research • Education • Innovation

Unicancer is the federation of French comprehensive cancer centres (FCCCs), a major player in cancer research and a network of 20 private, non-profit healthcare centres specialised in oncology, brought together in a health cooperation group.

Our values

EXCELLENCE

In a quest for excellence, our care and research teams mobilise to be at the forefront of the fight against cancer.

SOLIDARITY

Non-profit and accessible to all, the Unicancer model offers comprehensive, personalized and innovative care.

HUMANISM

Patients are involved throughout their treatment pathway, as partners of the healthcare professionals.

INNOVATION

Driven by a research culture, our network offers patients rapid access to the latest innovations

Unicancer is...

More than 22,000 people involved in care, research, education and innovation on a daily basis.

Our university hospitals play a major role in cancer care and research. They provide a 100% public service, accessible to all, throughout France. They provide comprehensive, multidisciplinary cancer treatments, guaranteeing quality healthcare to more than 540,000 patients every year.

Driven by strong human values, they offer a unique model of shared decision-making that involves patients in their treatment pathway. As the French leader in oncology research, the Research departments of the Unicancer federation and of the 18 French comprehensive

cancer centres (FCCCs) are the leading academic sponsors of clinical trials in this field, on a European scale, with a strong worldwide recognition.

Unicancer is also a pioneer in health data research, with four national real-life data platforms launched since 2014.

Innovative by nature, the FCCCs are driving the major developments in the fight against cancer, to constantly improve care, find the best treatments, reduce the after-effects and prevent tumours. Our network strives to offer patients early detection and more innovative treatments. Together with patients, we are fighting cancer on a daily basis and building the cancer care of tomorrow.

Key figures of the Unicancer network

A NATIONAL NETWORK FOR GREATER LOCAL PRESENCE

18 French comprehensive cancer centres **+2** affiliated centres  spread across **22** hospital sites

IN FRANCE THE CENTRES OF OUR NETWORK TREAT

of women with breast cancer

of women with a gynaecological cancer

of patients with endocrine cancer

540,000

cancer patients treated each year

A HIGHLY QUALIFIED AND SPECIALISED TEAM

MORE THAN

22,000 employees

STATE-OF-THE-ART EQUIPMENT

Particularly innovative equipment such as proton therapy centres, CyberKnife®, Intrabeam®, tomotherapy, etc.

A RECOGNISED EXPERTISE

11 national reference networks for rare adult cancers include FCCCs, out of 15 in France

15 centres specialised in paediatric oncology out of 47 in France

12 oncogenetics laboratories accredited by INCa, out of 26 in France

739 active clinical trials promoted in the network by the Fccc and Unicancer R&D 

16% of patients treated in FCCCs are included in a clinical trial, compared to an average of 8.5% in French healthcare facilities

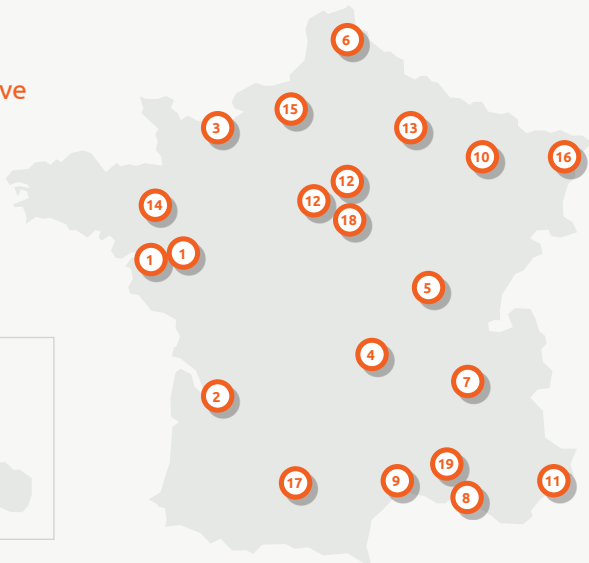

12 CLIP² early stage trial centres accredited by INCa out of 19 in France

1/3 of French international publications in oncology
